The American Community Survey provided estimated citizen voting age population (CVAP) data at the block group level in a Special Tabulation. Because the MOE can only be calculated using whole block groups, all block groups with more than 50% of the population in a district are included in the analysis. The Red-118 report provides a summary of the block groups used in the analysis.

The percent for each CVAP population category is that group's CVAP divided by the CVAP total.

Numbers in parentheses are margins of error at 90% confidence level.

A map showing a section of a river, likely the Rio Grande, flowing from the top left towards the bottom right. The river is depicted with a blue line and a light blue shaded area representing the water. The land on the right side of the river is colored light purple. Two locations are labeled in bold black text: "Rio Bravo" is positioned in the upper right, and "El Cenizo" is positioned in the lower right, closer to the river's bend.
